Important Notes

Electrical Safety and Standards

- Products are manufactured to class II and do not require an earth connection (see Wiring Diagram).
- Mains power supply must be switched off prior to starting electrical installation.
- If there are only two wires coming from your power supply, fitting can be wired to an unearthed circuit.
- All electrical products should be fitted by a qualified electrician in accordance with national wiring regulations (BS61).
- Before drilling, ensure there are no hidden cables or pipes in the wall.
- Products are for in door use only.
- Moisture must not come into contact with the electrical components.
- Products rated ip44 can be installed in bathroom zone 2 only (see Bathroom Zones Diagram).

Compliance

Products in this manual comply with the following safety standards: BS EN 60598-1: 2008+ A11: 2009, EN60598-2-1: 1989.

Other Safety Notes

- Work from a suitable platform when operating at heights.
- Wear suitable eye protection when drilling.
- Be careful when using power tools near water.

Wall Types

- Fixings supplied are generally for solid walls.
- For dry stud walls, purchase suitable fixings.
- For advice on suitable wall fixings, contact your local DIY store.
- If fitting on tiles, use a ceramic drill bit and insert wall plugs below the tile.

Please place the product in a well ventilated environment to avoid oxidation caused by long-term humidity.
