

TREPANEL[®]

LUXURY WALL PANELS & ACCESSORIES

www.bathroommountain.co.uk

Trepanel Flex® brings adaptable style to any interior with its innovative curved design and flexible felt backing. Crafted from FSC - certified MDF and finished with real wood veneer, each panel is designed to wrap effortlessly around walls, corners, and even furniture for a seamless, high-end look. Whether you're creating a statement feature wall or adding character to awkward spaces, this versatile wood panelling solution offers an easy and stylish way to transform your home. Perfect for DIYers and interior enthusiasts alike, Trepanel Flex® makes it simple to achieve a custom, professional finish.

Trepanel Flex Pole Wrap - 1200 x 600

Curves, corners, and creative flair - Trepanel Flex® Oak is made to move with the structure of your home. These flexible wall panels feature a double semi-circle design crafted from FSC-certified MDF, backed with ultra-thin felt to bend effortlessly around surfaces for seamless wood panelling on feature walls and even furniture! Each slat is wrapped in real wood veneer for an authentic look and feel, with all sides beautifully finished for a high-end, wraparound effect. The classic oak colouring brings a soft, golden warmth to interiors - a timeless shade that complements both contemporary and traditional spaces.

Fixing Guide

To fix Trepanel Flex® we recommend using [Mapei Super Grip Panel Adhesive](#). One panel requires one tube of adhesive.

The wood veneer is a natural material, and each piece of veneer is unique in terms of wood's natural characteristics, that being texture, colour variation and grain. It also may undergo changes over time when exposed to light.

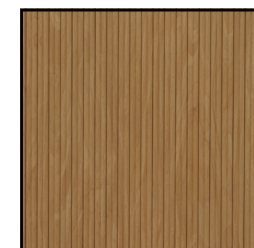

Please note: We do not recommend use in areas close to a heat source, e.g. a hob or fireplace, or where they will come into direct contact with water.

- Forest Stewardship Council (FSC) certified MDF for lightweight build
- Real wood veneer offers authentic wood slat aesthetic
- Wood veneer wraps all angles for smooth finish
- Double, semi-circle slat profile to aid seamless look around curves
- Thin, ultra-flexible felt backing offering adaptability around corners
- Easy to cut and install makeup for DIY enthusiasts!
- Multi-functional - can be used across feature walls or furniture
- Versatile 1200 x 600mm format with 10mm thickness
- Simple maintenance with no need to oil or paint
- Warm, wood shade offers cosy atmosphere

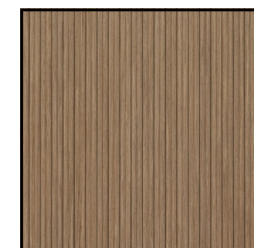

Cleaning & Maintenance

We recommend regular cleaning with a duster or soft brush to gently remove dust and debris, and avoid harsh brushes and scratchy materials. **DO NOT** use any type of wood or furniture polish, as it can damage the veneer.

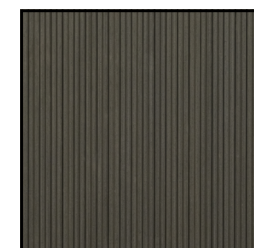

Our panels are fully finished, so no need for additional maintenance or oiling. Periodic use of vacuums with a soft attachment can easily remove dust. For more stubborn stains, use a damp cloth (not wet). If spills occur, use a clean, absorbent cloth to dry immediately. Avoid excess moisture with Trepanel Flex® as they should not come into contact with liquids.

Trepanel Flex Pole Wrap - 2400 x 300

Soft curves and endless possibilities - Trepanel Flex® is designed to shape itself around your home. These tall-format flexible wall panels feature a double semi-circle slat design crafted from FSC-certified MDF, backed with ultra-thin felt to bend effortlessly around the surface for seamless wood panelling on feature walls and even furniture! Each slat is wrapped in elegant veneer that is silky to the touch, with all sides beautifully finished for a high-end, wraparound effect. The warm colouring brings a bright, airy style to interiors - a timeless look that complements both traditional and modern homes.

Installation Guide

Follow the steps below in order to setup the Trepanel Flex® pole wraps properly;

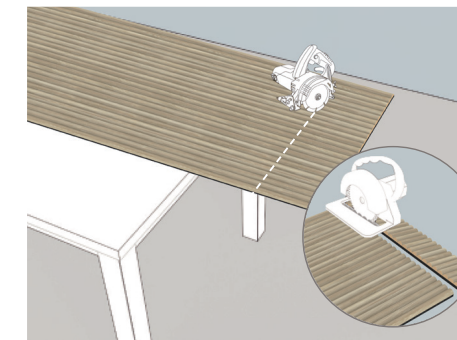

Step 1: Prepare all the tools and materials you need.

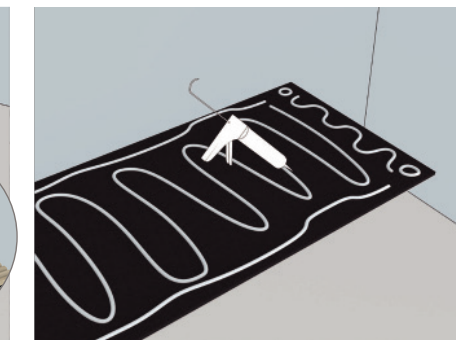

Step 2: Measure the height of the wall.

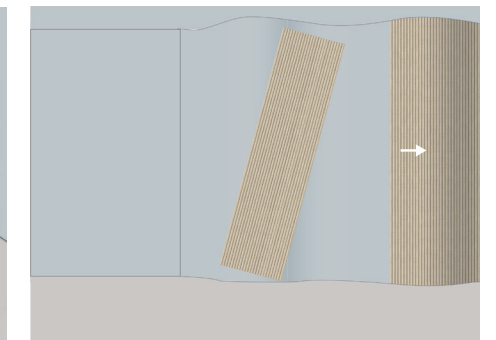

Step 3: Cut the acoustic panel according to the height of the wall.

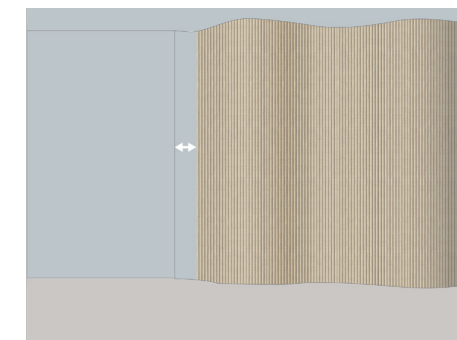

Step 4: Apply the nail-free glue to the back of the acoustic panel.

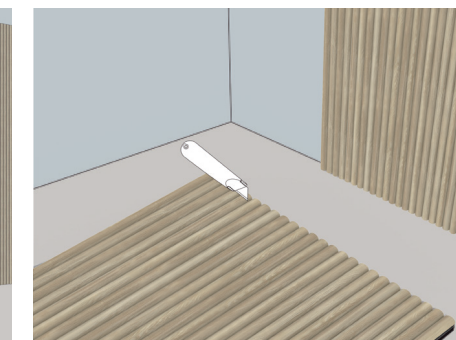

Step 5: Attach acoustic panels to the wall with nail-free glue in turn

Step 6: Measure the remaining width.

Step 7: Cut the acoustic panel into the remaining width.

Step 8: Complete the installation.
